

Shenabeth Jenkins

Full-Stack Software Engineer | Web, Mobile & Scalable Applications

Silver Spring, MD | shenabeth@gmail.com | shenabeth.github.io | linkedin.com/in/shenabeth-jenkins

EDUCATION

University of Maryland – College Park

Bachelor of Science in Computer Science, Minor in Astronomy

College Park, MD

Montgomery College

Associate of Arts in Computer Science

Rockville, MD

EXPERIENCE

AI System Designer

YVIBA Inc.

May 2026 – Present

Remote

- Iterated on AI-generated technical roadmaps, prototypes, and product logic through rapid feedback cycles with leadership, refining deliverables against evolving and loosely-defined specifications
- Evaluated and directed multi-model AI output against architectural goals, translating ambiguous, high-level direction into structured documentation and early-stage system design

Web Developer & UX Designer

Toucan Family

May 2025 – Aug 2025

Remote

- Spearheaded responsive website redesign using Figma and Squarespace, completing a 2-month turnaround on a project delayed 3 months and achieving 100% client satisfaction
- Directed client discovery and weekly design reviews, translating stakeholder requirements into wireframes, branding systems, and production-ready assets

Game Developer

Memley

May 2023 – Aug 2024

College Park, MD

- Designed and developed 15+ interactive gameplay levels and mechanics using React Native and GameMaker Studio to increase engagement in a memory-training mobile application
- Implemented JavaScript-based in-app purchase system and digital asset store while mentoring teammates on coding standards and Git workflows

Data Analyst

Quantifiable

May 2022 – Aug 2022

Remote

- Engineered advanced regex filters in Google Analytics to improve marketing attribution accuracy and independently completed 80% of assigned client deliverables
- Improved project visibility by documenting client meetings and managing Jira action items, ensuring consistent on-time sprint delivery

PROJECTS

SAI System: AI Agent Development Platform | *Next.js, TypeScript, Supabase, Vercel, APIs* | Live Demo

May 2026

- Created a full-stack platform for specialized AI agents using structured instruction frameworks, configurable workflows, and multi-model LLM integration
- Engineered secure user authentication with Supabase and Google OAuth, encrypted API credential management, and scalable bring-your-own-key support for Gemini and Groq AI services

CareerOS: Job Application Management System | *React, TypeScript, Tailwind CSS* | Live Demo

Jan 2026

- Engineered a job application management system using React Context for global state management and React Hook Form for structured form validation
- Built analytics dashboards and responsive UI components with Recharts, Tailwind CSS, and Radix UI

Electronic Arts – Software Engineering Virtual Experience | *C++*

Oct 2025

- Designed gameplay feature architecture for The Sims 4 including UML diagrams and C++ object model implementation
- Refactored inventory system data structures to improve maintainability and modularity

SKILLS

Languages: Java, Python, JavaScript, TypeScript, C++, C#, Kotlin, SQL, HTML/CSS

Frameworks: React, React Native, Next.js, Node.js, Express, Flask, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL

Technologies: Git, GitHub, Docker, REST APIs, Linux, Render

CERTIFICATIONS

CompTIA Tech+

Jun 2026

Google UX Design Professional Certificate

Feb 2025

Microsoft UX Design Professional Certificate

Feb 2025

Google Cloud Data Analytics Professional Certificate
